

PREMIUM AUDIT

NAME OF PROJECT	constellation doge
TOKEN BEP20 ADDRESS	0x1642C5E36822Ad371bDb3aF81F9840a456A0969
WEBSITE / TELEGRAM	https://csdoge.finance/

DISCLAIMER: PLEASE READ FULL AUDIT

IMPORTANT DISCLAIMER

I.

NOT RESPONSIBLE

Our audit report is not responsible for anything if the project audited turn into a scam.

II.

NOT GUARANTEE

Analytix Audit in no way guarantees that a project will not remove liquidity, sell off team tokens, or exit scam.

III.

INFORMATION

Analytix Audit do a research and provides public information about the project in an easy-to-understand format for the common person.

IV.

AUDIT AGREE

Agreeing to an audit in no way guarantees that a team will not remove all liquidity ("Rug Pull"), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam

V.

ENCOURAGE INVESTMENT

Analytix Audit in no way takes responsibility for any losses, nor does Analytix Audit encourage any speculative investments

VI.

INFORMATION

The information provided in this audit is for information purposes only and should not be considered investment advice. Analytix Audit does not endorse, recommend, support, or suggest any projects that have been audited.

TOKENOMICS - OVERVIEW

- More than 15% of the tokens are unlocked

(This comment refers to when the audit was carried out maybe team locked tokens later)

CONTRACT CODE - OVERVIEW

QUICK REVIEW

- Owner can't modify fees.
- Owner can modify fee threshold
- Owner can pause contract

Owner Privileges:

```
520 * Requirements:
521 *
522 * - the calling contract must have an ETH balance of at least `value`.
523 * - the called Solidity function must be `payable`.
524 *
525 * _Available since v3.1._
526 */
527 function functionCallWithValue(
528     address target,
529     bytes memory data,
530     uint256 value
531 ) internal returns (bytes memory) {
532     return functionCallWithValue(target, data, value, "Address: low-level call with value failed");
533 }
534
535 /**
536 * @dev Same as {xref-Address-functionCallWithValue-address-bytes-uint256-}[`functionCallWithValue`], but
537 * with `errorMessage` as a fallback revert reason when `target` reverts.
538 *
539 * _Available since v3.1._
540 */
541 function functionCallWithValue(
542     address target,
543     bytes memory data,
544     uint256 value,
545     string memory errorMessage
546 ) internal returns (bytes memory) {
547     require(address(this).balance >= value, "Address: insufficient balance for call");
548     require(isContract(target), "Address: call to non-contract");
549
550     (bool success, bytes memory returndata) = target.call(value: value)(data);
```

```
function setWhiteList(address a, bool status) public onlyOwner {
    function setFeeThreshold(uint _f) public onlyOwner {
function setSwapAndLiquify(bool enabled) public onlyOwner {
    function setMarketFeeAddress(address a) public onlyOwner {
        function dropOwnership() public onlyOwner {
            function setBurnFeeAddress(address a) public onlyOwner {
                function setNftFeeAddress(address a) public onlyOwner {
                    function setMarketReserveAddress(address a) public onlyOwner {
                        function setPrivateSaleReserveAddress(address a) public onlyOwner {
                            function setNftReserveAddress(address a) public onlyOwner {
                                function setPreLaunchLock(address a) public onlyOwner {
                                    (Owner can blacklist wallet address)
                                function setLiquidityReserveAddress(address a) public onlyOwner {
                                    function setTeamReserveAddress(address a) public onlyOwner {
                                        function pause() external onlyOwner {
                                            function unpause() external onlyOwner {
                                                function initAddress(address _marketFeeAddress,
                                                    function init() external onlyOwner {
                                                        function renounceOwnership() public virtual onlyOwner {
                                                            function transferOwnership(address newOwner) public virtual onlyOwner {
```

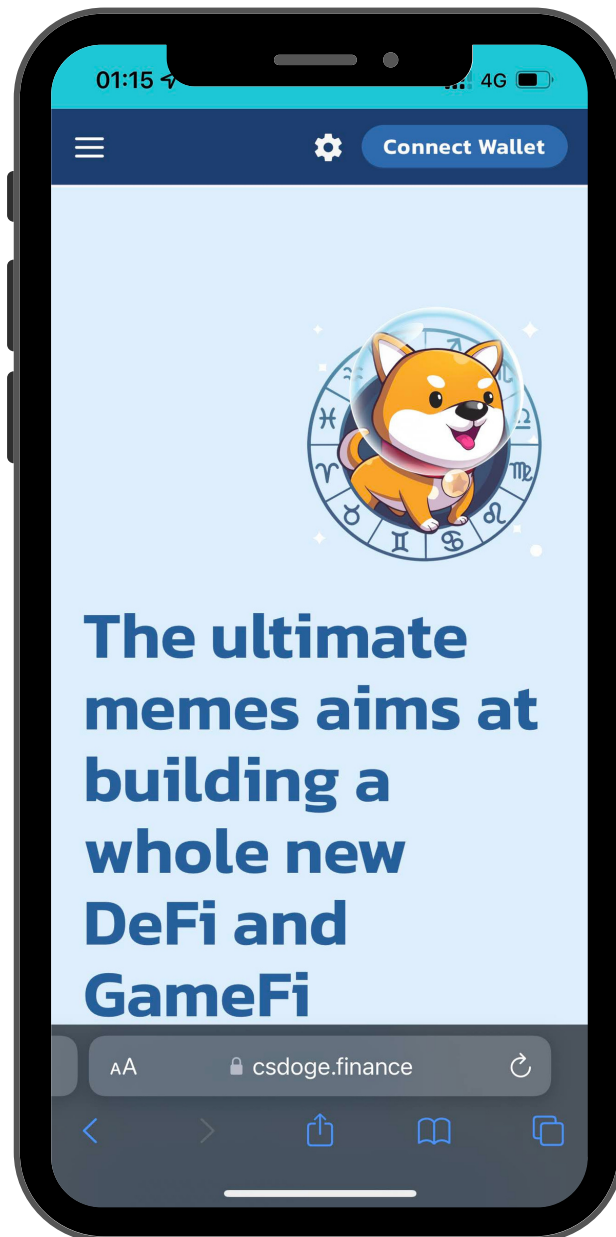

Issue Checking:

N°	Issue description.	Checking Status.
1	Compiler Errors	Passed
2	Race conditions and Reentrancy. Cross-function race conditions.	Passed
3	Possible delays in data delivery.	Passed
4	Oracle calls.	Passed
5	Front running.	Passed
6	Timestamp dependence.	Passed
7	Integer Overflow and Underflow.	Passed
8	DoS with Revert.	Passed
9	DoS with block gas limit.	Passed
10	Methods execution permissions.	Passed
11	Economy model.	Passed
12	The impact of the exchange rate on the logic.	Passed
13	Private user data leaks.	Passed
14	Malicious Event log	Passed
15	Scoping and Declarations.	Passed
16	Uninitialized storage pointers.	Passed
17	Arithmetic accuracy.	Passed
18	Design Logic.	Passed
19	Cross-function race conditions.	Passed
20	Safe Zeppelin module	Passed
21	Fallback function security.	Passed

Audit Result:

PASSED
